

Introducing the IM Classroom

ABOUT IM

Illustrative Mathematics® (IM) is a leader in problem-based mathematics education and continues to guide and inspire educators who are doing extraordinary work.

IM K-12 curriculum has reached over **1.5 MILLION** students

THE IM CLASSROOM IN ACTION

The IM Classroom is Illustrative Mathematics' wrap-around support model for school districts, where all students are active participants in their learning. The IM Classroom stands on these four pillars:

CURRICULUM

Teachers and students use an IM Certified® curriculum and practice IM's problem-based instructional model with integrity.

LEARNING

Teachers participate in IM Certified® Professional Learning and have access to implementation support.

LEADERS

School and district leaders understand and support the systemic changes that are necessary to change teachers' practice.

COMMUNITY

Families and communities are engaged with and support their students' learning.

Did you know the IM K-12 curriculum has served more than **28,000** teachers?

The best IM classroom is one where you have students with really different backgrounds in math, or different ways of seeing and thinking, that can come together and create this incredible learning together."

GRETA ANDERSON, IM CERTIFIED® PROFESSIONAL LEARNING FACILITATOR, ILLUSTRATIVE MATHEMATICS

Curriculum is more than words on the page—the IM Classroom is our complete set of offerings around the future.
